

Volunteers Needed for Research Study on Stigma and Postpartum Depression.

The purpose of this study is to look at how stigma and decisions about treatment and health behaviors are related in women with depression in the postpartum period. The study will also look at whether a dietary supplement is an acceptable treatment for postpartum depression.

You May Qualify If You

- Are between 18 and 45 years old
- Have had a baby in the past 12 months
- Do not have schizophrenia or bipolar disorder

Participation Involves

- Completing a panel of online surveys

Location: Online

Participants will receive a \$5 gift card.
